

# The evaluation of eGlasses eye tracking module as an extension for Scratch

Tomasz Kocejko, Jacek Ruminski, Adam Bujnowski and Jerzy Wtorek  
Department of Biomedical Engineering, Gdansk University of Technology,  
Poland

- The eGlasses eye tracking module is suitable for fast interaction design
- The eye tracking extension for Scratch is highly usable even for users with no prior experience with eye tracking
- The Scratch might be a convenient software for therapist and disable to check simple interaction design

The eGlasses prototype
